# Select Deep-Sea Salmon Meat Specially Made Super Large Cubes Return to Carnivorous Nature

Cats and dogs prefer meat inherently. In ancient time, quickly hunting in long distance take away lots of energy. Therefore, they preferred to have meat and took some fruits and vegetables as nutritional supplement to satisfy their body.

Kitchen Flavor Grain Free series select various premium meat and delicious vegetables to delight and energize picky cats and dogs.

# Rich Ingredients with High Palatability

Deep-Sea Fish rich in  $\omega$ -3 &  $\omega$ -6 unsaturated fatty acids.

Chicken delicious and rich in quality protein.

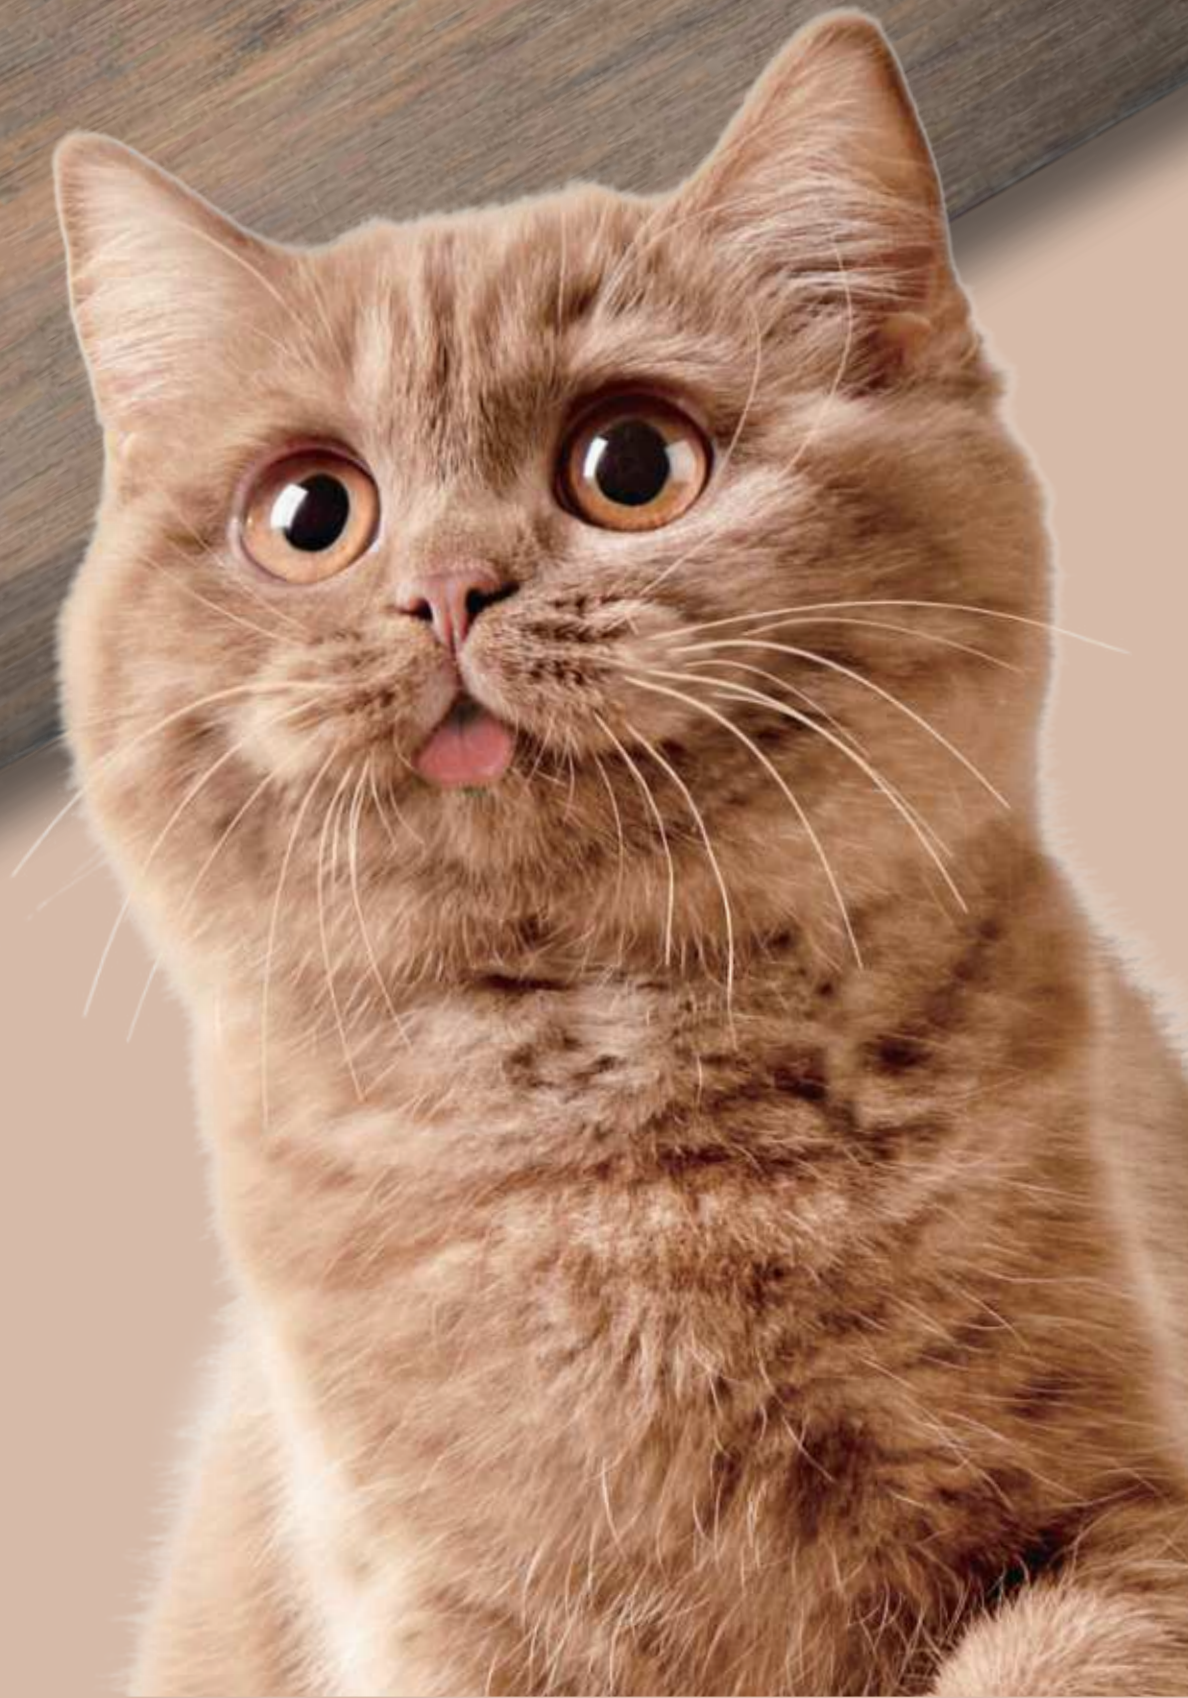

Pea rich in necessary amino acids.

Potato Vitamin A, carotene, Vitamin C.

Sweet Potato rich in dietary fiber.

# Low Sensitivity Ingredients

Researches have shown that food-borne allergy can lead to skin and stomach illnesses such as skin itch, emesis, and diarrhea.

Kitchen Flavor Grain Free series refuse the following common allergic ingredients and reduce risk for allergies to provide a feast for pets and let owners comfortable.

**NO GRAIN**

**NO DAIRY**

**NO GLUTEN**

**NO SOYBEAN**

**Baby Kitten:** during age 4-5 weeks, it is necessary to moisten the dry kibbles with warm water to let baby. kitten to get use to the new food. After the learning and transit period dry kibbles can be fed directly without moistening.

**Pregnant Cat:** Increase 10% of feeding amount weekly basis from the 6th week to the next three weeks.

**Lactating Cat:** Increase 50% of recommended daily feeding amount under accordingly.

Recommended daily feeding amount is for reference only. Please feed your pet according to its body condition and activity level.

(2) RECOMMENDED FEEDING METHOD

- Feed it as recommended daily feeding amount, let the cat eat freely.
- It provides complete and balanced nutrition for your cat.
- Feeding amount will vary, depending on your cat's health, age, activity level, season and environment.
- Fresh water should be available for your cat at all times.

(3)RECOMMENDED TRANSITION METHOD

Switching to new pet food is sensitive to digestive tract of cat. A smooth transition method can adjust the enzymes in cat's digestive tract naturally. And it is easier to digest and absorb the new food and its nutritional composition.

To enable a smooth transition to new food, please mix new product with old product-gradually increasing the amount of new product-over a period of 7 days until only new product is fed.

## BRAND STORY

“**Happy Eating**” is the original intention behind our brand and the culinary atmosphere we have always maintained for pets and pet owners. KitchenFlavor passionately embody this philosophy by meticulously crafting every meal to be a delightful feast, with visible real meat cubes and vegetable kibbles.

From wilderness to forest, from grassland to deep sea. KitchenFlavor never stops the quest for delicacy. Pure, Nature, Delicious, Juicy, Nutritious, Healthy. There's always proper food from KitchenFlavor natural recipe for your furry companions.

# PRODUCT QUALITY TRACEABILITY SYSTEM

Retain samples for each batch of products to observe and monitor the quality. For dry food, the sampling interval has reached **1 hour/batch**, and the storage period is **20 months** which is much higher than the national and industry standards. For wet food, each pot will be sampled and stored, and the storage period is **26 months**.

# CERTIFICATIONS

Since its establishment in 2002, Bridge PetCare has consistently prioritized quality, obtaining certifications from various international authoritative organizations including **ISO9001**, **ISO22000**, **BRC**, **GMPHACCP** and so on.
